

Workday Named a Leader in the 2023 Gartner® Magic Quadrant™ for Financial Planning Software
Company Positioned as a Leader Based on Completeness of Vision and Ability to Execute

LONDON, UK, Dec. 19, 2023 — [Workday](#) (NASDAQ: WDAY), a leader in enterprise cloud applications for [finance](#) and [human resources](#), today announced it has been named a Leader in the [2023 Gartner Magic Quadrant for Financial Planning Software](#)* for the second time since the category's inception last year. A complimentary copy of the report is available [here](#).

As business continues to move at an accelerating pace, organisations must plan more frequently using massive datasets and create more scenarios to account for possible fluctuations. More than 6,300 organisations across the globe, including Life Care Services, Ryder System, Inc., Salesforce, Shutterstock, Wintrust, and more use [Workday Adaptive Planning](#) to help drive more confident, strategic decision-making faster than ever.

"We believe this recognition is an acknowledgement of our innovation and unique blend of easy-to-use functionality with a system that can handle large data volumes to meet complex modelling requirements," said Dennis Yen, general manager, Planning, Workday. "With Workday AI embedded into the core of Workday Adaptive Planning, customers can surface real time insights and make faster decisions to keep pace with the speed of business."

With Workday Adaptive Planning, customers experience:

The Unique Combination of Powerful Performance at Scale and Ease of Use

Powered by Elastic Hypercube Technology (EHT), Workday Adaptive Planning efficiently calculates complex models by adding memory and compute power as needed, resulting in dynamic, automatic scaling. With this powerful modelling engine, Workday Adaptive Planning supports the most complex, multi-dimensional models without sacrificing speed.

Additionally, a user-friendly experience enables financial planning and analysis (FP&A) teams to configure models on the fly by adjusting dimensions, logic, and formulas as needed, without learning how to program, build scripts, or call in technical resources.

A Platform-Agnostic Solution that Works with Workday and Non-Workday Data Sources

An out-of-the-box, built-in integration framework enables customers to effectively integrate any third-party system of record with Workday Adaptive Planning. These include enterprise resource planning (ERP), customer relationship management (CRM) software, marketing and HR systems, and data warehouses.

Workday was also recently [named](#) a Leader in the 2023 Gartner Magic Quadrant for Cloud ERP for Service-Centric Enterprises as customers experience even more benefits in the form of streamlined workflows and a common user experience when Workday Adaptive Planning is connected to the Workday platform.

Workday AI for Data-Driven Insights and Faster, More Informed Business Decisions

With Workday Adaptive Planning, customers can leverage powerful AI technology without technical expertise as capabilities are designed for ease-of-use. For example, the predictive forecaster within Workday Adaptive Planning uses machine learning to automatically create demand forecasts by quickly analysing historical and third-party datasets.

Further, a new generative AI capability [previewed](#) at Workday Rising will enable users to use conversational text to navigate the system, surface data quickly, uncover insights, and get recommended actions based on those insights.

Forward-Looking Statements

This press release contains forward-looking statements including, among other things, statements regarding Workday's plans, beliefs, and expectations. These forward-looking statements are based only on currently available information and Workday's current beliefs, expectations, and assumptions. Because forward-looking statements relate to the future, they are subject to inherent risks, uncertainties, assumptions, and changes in circumstances that are difficult to predict and many of which are outside of Workday's control. If the risks materialise, assumptions prove incorrect, or we experience unexpected changes in circumstances, actual results could differ materially from the results implied by these forward-looking statements, and therefore you should not rely on any forward-looking statements. Risks include, but are not limited to, risks described in Workday's filings with the Securities and Exchange Commission ("SEC"), including Workday's Form 10-Q for the fiscal quarter ended October 31, 2023, and other reports that we have filed and will file with the SEC from time to time, which could cause actual results to vary from expectations. Workday assumes no obligation to, and does not currently intend to, update any such forward-looking statements after the date of this release.

Any unreleased services, features, or functions referenced in this document, Workday's website, or other press releases or public statements that are not currently available are subject to change at Workday's discretion and may not be delivered as planned or at all. Customers who purchase Workday services should make their purchase decisions based upon services, features, and functions that are currently available.
